PRANAV MAGDUM

Full-Stack Developer | Computer Engineering Student

Pune, Maharashtra • pranav@example.com • +91 XXXXX XXXXX • github.com/pranav • linkedin.com/in/pranav

PROFILE

Computer Engineering student and aspiring Full-Stack Developer focused on building scalable web applications and practical AI-powered features. Strong interest in backend development, problem solving, and creating reliable end-to-end products. Currently seeking software development internships for 2027.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, Python
Frontend: React, HTML, CSS, Tailwind CSS, Vite
Backend: Node.js, Express.js, REST APIs, JWT
Databases: MongoDB, PostgreSQL, Prisma
Tools: Git, GitHub, Postman, Docker
AI: LLM APIs, RAG concepts, AI-assisted application features

PROJECTS

AI Codebase Assistant | React, Node.js, PostgreSQL, pgvector, LLM APIs

- Built a platform concept for analyzing GitHub repositories, commits, and pull requests using AI.
  - Designed automated insights for architecture, code quality, security risks, maintainability, and technical debt.
  - Planned a RAG-based architecture with PostgreSQL/pgvector for repository-aware AI analysis.

Full-Stack Payment Application | React, Node.js, Express.js, MongoDB, JWT

- Developed authentication, protected routes, user management, and REST APIs.
  - Implemented JWT-based authentication and tested APIs using Postman.

Zerodha Landing Page | HTML, CSS

- Recreated a responsive trading-platform landing page to strengthen frontend layout and styling fundamentals.

EDUCATION

Bachelor of Engineering — Computer Engineering | SPPU, Maharashtra
Expected Graduation: 2028 | Current Semester: 4th

PROBLEM SOLVING & ACTIVITIES

- Regularly practice Data Structures & Algorithms and competitive programming problems.
  - Actively learning modern full-stack development and contributing to open-source projects.
  - Interested in scalable systems, backend architecture, and meaningful applications of AI.

CAREER OBJECTIVE

Seeking a software development internship where I can contribute to real-world products, strengthen my engineering skills, and learn from an experienced development team.
